THE POWER OF A CHANGED MIND

DO YOU HAVE PATIENT CASES YOU ARE HAVING DIFFICULTY WITH?
Their symptoms have become chronic, they are frustrated with life, and “everything just hurts”?

BELIEVE IT OR NOT, YOU ARE NOT ALONE!
Maladaptive psychosocial factors often limit one’s progress and are present in about every patient from your pediatric population, to the skilled athlete, to the senior citizen recovering from a joint replacement, all to varying degrees.

LEARN A STRATEGIC APPROACH
In managing your chronic pain patients while improving their overall quality of life.

JOIN OUR PERSISTENT PAIN FELLOWS
as they provide an activity-filled course on persistent pain. Help your patients reach their full rehab potential while you reach success within yourself as a clinician.
